### Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of moving a reticle, classified in class 414, subclass 806.
- II. Claims 11-42, drawn to an end effector, classified in class 294, subclass 1.1.

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process can be practiced with an end effector other than that set forth in claims 11-42

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication should be directed to D. Underwood at telephone number (703) 308-1113.
